

Cyclops Multi-Point Awning / Casement Window

Heavy duty and built to last, the Cyclops Multi-Point Awning / Casement Window is capable of withstanding cyclonic wind conditions. Concealed multi-point operable fixings offer supreme durability, converting a basic awning / casement window into a fixed and secured glass panel. Cyclops can be retrofitted to most standard awning / casement windows available in the market today – including pre-existing fixtures. Cyclops has been tested to withstand extreme weather conditions, including 360 km/hr winds and 800pa water penetration resistance.

FEATURES & BENEFITS

- Concealed fixings with one handle able to operate several locking points
- Retrofits to existing awnings
- Smooth lining and edging
- Cast corners to ensure fast, precise and secure assembly
- State-of-the-art Santoprene Ezi-Seal technology
- Continuous top hinge – secures sash and provides extreme weather durability
- Enhanced air ventilation

PRODUCT OPTIONS

- Single, double, or high-impact glazed sash options
- Snap-in adaptor sections for modular configurations
- Key-lockable chain winders
- Ezi-Fit security or fly screen provision
